NATIONAL SCIENTIFIC CONVENTION.

American Association for the Advancement of Science.

FOURTH DAY-CHNERAL SESSION.

dal Report of the New York Herald.

CLEVELAND, Aug. 1, 1853 .-The Association met this morning, as usual, in the basement of the Second Presbyterian Church, Prof. Pierce in the Chair.

The President announced that the first busin

was the report of committees.

Previous to these reports, the following gentlement were elected members of the association: -Dr. James Nichols, Massachusetts; Wm. C. Turner, Cleveland; Jesse Markham, Salem, O.; Dr. J. H. Pulte, Cleveland; Rev. J. F. Bingham, New York; Joseph Bullivant, Columbus, O.; Wilhelm Blazius; W. S. Bullivant, Columbus, O.; Rev. Samuel Newberry, Ohio; Isaac N. Mason, Cleveland, O.; S. Johnson, New Haven; J. J. Husband, Cleveland, O.; John Gandry, Cincinnati, O.

The Standing Committee recommended the apcintment of the following gentlemen, each a committee, to report on the subjects assigned them at the next meeting, and by no means to be delayed beyond the second session, which was unanimously adopt-

Prof. Hall—On Recent Additions to our Knowledge of the Poleozole Rock. Prof. J. L. Smith—On Micro-Chemistry. Prof. Gibbes—On the Recent Progress Organic of Che-mistry.

nistry.
Dr. Gould—On the Progress and Developments of the Electro Chronograpic Method of Observation.
Dr Leidy—On the Remains of Extinct Mammalia and Reptilia in North America.
Prac. Pierce—On the Present State of the Theory of Planciary Perturbation.
Dr. Burnett—On Recent Advances in Anatomy and Paragillary. Physiology.
Prof. Agassiz—On the History of our Knowledge of Al-lersation of Genera ion in Animals.
Prof. Dana—On the Distribution of the Lower Animals.

Dr. WOLCOTT GIBBES then read a report relative to the funds of the association and the sale of the volumes of the proceedings. This report strongly condemned the custom of selling the volumes of the proceedings at a high, or at any price at all, and also the custom of collecting so large an annual fee from the members; expressing the belief that we had no possible need of funds, except to pay the

had no possible need of funds, except to pay the permanent Secretary and the general incidental expenses of each meeting.

Dr. Gould remarked that it was the primary purpose of those forming the association to make it the means of an easy interchange of information, attendance, &c. He knew that thus far the assessment was burthensome, and had contravened the beneficial purposes of the organization. He knew that a lady of Boston had presented to the association a large number of volumes left in the library of her husband at his death, which were to be presented to the members of the association. These volumes had been taken and sold, to the extraordinary mortification of the lady, and derogation of the association. He deprecated the whole system as unnecessary, oppressive, and positively productive of dissatisfaction. The remarks gave great satisfaction to the association.

Professor Hall, said, that in the old association is

The remarks gave great satisfaction to the assoriation.

Professor Hall said, that in the old association it
had been the purpose to keep the assessment law.

It was once as low as 12½ cents. True, the number
of members was small. If the citizens of cities, or
individuals, chose to publish the volumes, then let
the members have the volumes free of charge. It
was wrong to assess in this way by selling volumes.

Rather pay twice the sum in any other way. He
was, and had been, opposed to a fund; thought that
it was unnecessary, and would prove disastrous.

Lieutenant Hunr thought that this would be begging cities to invite and assist us.

Professor Hall thought not, and would despise
such a process.

Professor Hall thought not, and would despise such a process.

Professor Bache thought that we should be independent of these gratuities, that every member should pay, and then we would ask no favors. We never have desired to speculate or raise a fund. We have discussed the propriety of offering premiums, and determined to offer none, as the British Association does, and therefore there is no need of a fund. Com. Wilkes wanted information, and thought that they had better be pristed.

Professor Gibbes said that a committee of ten was desired to consider wisely the whole matter of the revision of the constitution.

The President said they had come from the committee unanimously, and were considered wise and

The President said they had come from the committee unanimously, and were considered wise and important, or they would not be presented.

Professor J. L. Smirn thought them wise.

Professor Hall thought they were unanimously sustained. The assessment was among them, and the volumes should be distributed gratuitously.

Prof. Bacher regarded it only as one of those modifications so necessary to a progressive body. He did not reflect on the past. It would reflect on himself. We have advanced, and must change to keep have advanced, and must change to kee np with the times.

Dr. Gould said, that as there seemed to be a misapprehension regarding the resolutions, they had better be read.

ctier be read.

They were read again.

Mr. Redfield wished it understood that even un-

der these res. lutions it would be very long before the constitution could, or would, be changed. Prof. Levenine thought the first resolution might be so modified as to relate to future collections, and

that, as it now stood, it would reflect on the former administration. As it is, we are now a year ahead, and it was, probably, but commendable business foresight in the officers.

It was so amended as to read "further" collections, &c.
Com. WILKES asked what was the number of the

The PRESIDENT replied that it formerly had been

1,000; but was now 1,200.

The resolutions were unanimously adopted.

A resolution passed the Association modifying the resolution of Saturday last, which authorized the Perresolution of saturday asst, which authorized the Per-manent Secretary to purchase copies of the back volumes. It was so modified as to demand that he should furnish these volumes to the members of the Association at the cost price.

Dr. Gibbes now moved that the President ap-point the committee of ten gentlemen to revise the constitution.

The motion was carried, and the President an-

The motion was carried, and the President announced that he would make the appointment tomorrow, as it required some time for reflection.

The standing committee recommended calling on
the Permanent Secretary, Prof. Baird, to make a full

the Permanent Secretary, Prof. Baird, to make a full report to the Association of his operations for the year, and of all the moneys received, disbursed, and now on hand by him.

We believe that no report has as yet been made manifesting the condition of the treasury, which is said to be unnecessarily full. The only necessary expenditures are for programmes, &c., for the sessions, stationery, and the salary of the Permanent Secretary, which is three hundred dollars annually.

The general meeting then adjourned to three o'clock this afternoon.

A SINGULAR CASE .- A Miss Read, of West Boyle ton, took chloroform a few days ago, for the purpose of having a tooth extracted, and after the operation was performed she was attacked with severe pain in the head, became unconscious, and a processor. was performed she was attacked with severe pain in the head, became unconscious, and apparently died. Her friends supposing her dead, laid her out for burial, and began to prepare for the funeral ceremonies; but their grief was unexpectedly turned to fey and astonishment, on finsing that the supposed dead began to revive. She eventually recovered the full possession of her faculties; but what is still most singular in her case, as we are told, she suffers violent pains in the head as regularly as evening approaches, and at length, and about the same hour each night, falls into a swoon, very similar to that proaches, and at length, and about the same hour each night, falls into 2 swoon, very similar to that which, in the first instance, was supposed to be the sleep of death. This case certainly presents a most remarkable escape from premature burial.—Worces-

DODGING THE SPIRIT RAPPERS' PROPRECY .- An cocentric individual in the town of Essex has, during the present season, built a small vessel. After
having finished her, he had communication from
what purported to be the spirit of his deceased
father, who informed him that he would not live six
months after his vessel was launched. He immediately procured the assistance of several of his
neighbors, loaded her on wheels, and with several
woke of oxen she was drawn into the river at low neighbors, loaded her on wheels, and with several yoke of oxen she was drawn into the river at low water, and placed upon blocks, where she remained until high water, when she was affoat. She is named the "Lyvancha," and hails from "The Kingdom of God." She is believed to be the only vessel ever built there that was not launched.—Gloucester Telegraph.

GATHERING OF REPORTERS.—One of the most nu GATHERING OF REPORTERS.—One of the most numerous gatherings of reporters that we have ever known outside of a large city, was at the Plymouth celebration, on Monday last. There were no less than fifty three of the profession present. Over twenty quartered at the Samoset House. Of the whole corps present, about one-third were from the city of New York. Seventeen were skilful phonographers, sixteen practised various systems of stenography, and the balance appeared to be content with the elongated hand. It was a noticeable collection of workers, and represented a respectable degree of of workers, and represented a respectable degree of

REMTENCES.

**Pica of Guilly.—A Freechman, named Charles Jean Geddard, indicted for grand larcesy, pleaded guilty to the above offence, he having stolen a quantity of goods from Francis Brewn. The Court sentenced the prisoner to be imprisoned in the State prison for two years.

**Robbey.—John Stewart, who was indicted for robbery committed on the person of John Bishoo, pleaded guilty to assault and battery only; and the Court, having accepted his plea, sentenced the prisoner to be fined \$30, and stand committed until the fine was paid.

**Malicious Müchief.—John Moore, convicted of the above offence, he having set fire and destroyed a carriage belonging to Levi Adams, of Harlem, was sentenced to one year's imprisonment in the penitentiary.

**Patit Larceny.—James Fisher, convicted of petit larceny. James Fisher, convicted of petit larceny, having stolen two tubs of butter from a grocery store in Hester street, was sentenced to six months imprisonment in the penitentiary.

Manisoughter.—Alexander Patterson was next b rought up for sentence, he having been convicted yesterday of the above offenca in having caused the death of Mathius Wallus, on the Fourth of July last, by shooting him accidentally with a loaded musket. The Recorder, in pronouncing the sentence of the Court, said that although rearry everybody carried firearms on the Fourth of July, still the laws of the State do not allow any man to carry loaded fivearms in a city on any day. The jury having recommended him to the mercy of the Court as Henor suspended judgment in this case, and the prisoner was discharged.

Manisunghter.—Charles Beermer, who was indicted at the July term, for manisunghter, for having caused the death of Johanna Mary Wall by malpractice, was then brought up for trial. From the following evidence, the details of the shooking affair will be found highly interesting.

**Dr. Camer

Here the witness was cross-examined by the prisoner's coursel.

Madeline Ellen, being duly aworn, deposed—That she was a micwife; was in Mra Wall's house on the morning of her confinement; the prisoner was there; witness did not see anything done by the prisoner, as she was in another room; she afterwards saw him operating; he used a poker to obtain the deliverance; it was rusty, and he greased it, he said that he would have to take the arm off the child, the woman several times said that he would pull her body all te pieces; he commenced to work again, when she said he would tear her heart out; the dector then cursed at her. Witness told the prisoner that he ought to send for another doctor when he said if there were three more there they could not act any better than he could." Dr. Wilhelm was sent for after the prisoner gave up the operation, and he succeeded in delivering the woman in a few minutes.

Dr. Cameron again took the stand, and testified that the way in which the prisoner treated her was barbarous, and not legitimate. The pudling out of the arm was uneless.

Dr. Wilhelm, the Coroner, who delivered the woman

and not legitimate. The pulling out of the arm was useless.

Dr. Wilhelm, the Coroner, whe delivared the woman after the unsucessful attempt of the prisoner, was then examined, and testified to the condition he found the unfortunate woman in a description of which would shock the ears of all persons possessed of any degree of modesty. Several witnesses were then produced for the defence, testifying to the great skill of the prisoner as an accentum.

The counsel for the defence then summed up the evidence for the defence, arguing that a man of skill, as the prisoner was, would never have caused the rupture of the womb, and that it must have been spontaneous or caused by Dr. Wilhelm.

The Assistant District Attorney, Mr. Hall, then summed up the evidence for the presecution, contending that the greater the prisoner's skill the greater his culpable negligence, while attempting to celiver the decase of.

The Court then charged the jury, who after a few mo-

deceased.

The Court then charged the jury, who after a few moments consultation, sendered the versict of "Guilty of manalaughter in the fourth degree."

HIGHER LAW IN ERIE.—The citizens of Erie, Pennsylvania, are in a state of great excitement, on account of a proposition by the Lake Shore Railroad Company, to change the gauge at that place, so that the present delay and inconvenience arising from different gauges may be avoided. The alteration is about to be made under the authority of an act of the last Pennsylvania Legislature; but the people of Erie are determined to resist the change "at all hazards and to the last extremity." They held a meeting on the 19th uit, and passed resolutions which, the Post says, "amount to rank mullification, and are likely to lead to open war." They say the law was procurred by bribery and corruption, and is not binding on them. They are determined to tear up the railroad at all points where it crosses the streets of the city of Erie. The City Council met the same evening, and ordered the high constable to tear up the rails, and made it the duty of every citizen to aid in the work when called on, under a penalty of five dollars, and imposing a penalty of \$100 for resisting the order. Truly, they have stirring times in Erie. We hope the matter will be settled without bloodshed.

DESTRUCTIVE FIRE AT FAIRFAX COURT HOUSE .-DESTRUCTIVE FIRE AT FAIRFAX COURT HOUSE.—
A destructive fire occurred in the village of Providence, Fairfax Court House, yesterday morning.
The fire was discovered about 1 o'clock A. M., in the printing office of the Fairfax News. The office, with all its materials, was destroyed. The lower part of the building was occupied by Dr. W. P. Gunnell, as a physician's office, and Wm. H. Dulany as a law office. Dr. Gunnell saved nothing—loss about alw office. Dr. Gunnell saved nothing—loss about \$200. The books of Mr. Dulany in the front room were saved; those in the back room were destroyed. His loss is considerable. The flames soon spread to the adjoining buildings on either side. The law office of Wm. L. Edwards was burned, but most of the books were saved. Some valuable papers were lost. The building occupied by Mrs. Hunt was burned down—most of the furniture saved. A building next to this was burned. The buildings destroyed were all owned by N. Coarad, and were not insured. His loss is estimated at about \$1,000. The principal loss will fall upon the proprietor of the Fairfax News, who has, as will be seen, not only lost the material of his printing office, but all of his accounts and books. This is the largest fire that ever occurred at Fairfax, C. H.—Alexandria Gazette, Aug. 4.

SHOOTING AFFAIR NEAR ALLEGANY, N. Y .- We learn that a murderous affair occurred near Allegany, about 10 A. M., yesterday. The circumstance, as re-lated to us, is as follows:—Mr. John Murphy, agent lated to us, is as follows:—Mr. John Murphy, agent of Mr. N. Deverenx, went up to the Chipmunk Creek a short distance, with a party of Dutch, to look at a lot of land. On their return they came to a spot where a fence had been thrown across the road, during their absence up the creek, which they at once proceeded to remove. While engaged in this work the party was fired upon three times by several persons concealed in the bushes near by. At the last discharge, Mr. Murphy was dangerously wounded in the head—a bullet taking effect near the temple. We understand that he lies in a very critical condition. Another person was slightly wounded. Bultion. Another person was slightly wounded. Bul-lets and buckshot flew pretty briskly until the party managed to get out of the way.—Olean Journal, Angust 3.

HORRIBLE AFFRAY—THREE MEN KILLED—SIX WOUNDED DANGEROUSLY.—A party of about sixty workmen, engaged on the Ohio and Mississippi Railway, near the mouth of the Great Miami, got into some difficulty on Sunday, which resulted in a into some difficulty on Sunday, which resulted in a serious encounter at a temporary grog shop that evening. It seems that the men were divided into two parties—one from this city and one from Lawrenceburg—and that bad blood had previously existed between them. On Monday night the Lawrenceburg party, having been discomfited in the first encounter, returned to take vengeance upon the others. A terrible affray ensued, in which shovels, pickaxes, iron bars, clubs, &c., were freely used, and the final result was three men killed, six badly and probably shally wounded, and a large number of the remained tearfully cut up and beaten. The excitement in the vicinity was very great; all work on the road was suspended, but nobody had been arrested up to twelve o'clock on Tuesday.—Cincinnati Gazette, Aug. 4.

THE DELAWARE AND MARTLAND SHIP CANAL. We learn from the Delaware Republican that several of the directors of the company which has been orcanized for the purpose of constructing a canal to connect the Chesapeake and Delaware bays, waited on Gov. Ross a few days ago, with a view of getting him to call an extra session of the Delaware Legisla-ture. They offered to secure to the State \$20,000 a year for twenty years, if a charter shall be granted to them. The Governor held the matter under ad-visement for a few days.—Baltimore Sun, Aug. 2.

LONDON, Fridsy, July 22—5 P. M.

With a growing impression that the Russo-Turkish question will have a pacific solution, there has been more general disposition for business this week, and in the colosis and foreign produce markets a good deal of activity has prevailed. The deliveries of most articles exhibit an extensive home consumption, and exporters are now beginning to operate more freely Money for all commercial purposes continues abundant. Consols

are now beginning to operate more freely Money for all commercial purposes continues abundant. Coasos have improved, leaving off 98½ for money. Bar silver is ½ lower—5a. 1½d. Dollars, 4a. 11½d. American eagles in moderate demand, at 76a. 4½d.

The corn.market was in an excited state on Monday, in consequence of wet weather, and wheat was 2a. 3a., and flour is, a 1a. 6d. per barrel, and 2s. a 2a per sack deaser, with a good deal of speculative buying. The weather, though still unsettled, has been finer since. On Wednesday hardly anything was passing, but holders continued firm; while to-day's market must be written decidedly more buoyant, and importers less inclined to meet buyers. Last week's average price of English wheat was 49a. 8d., with a roturn of 86.250 quarters. Fine white American wheat we quote 55a. a 60s. United States flour, 25a. 6d. a 28s. 5d. per barrel; fancy brands 1s. more. Spring corn keeps quite firm; indeed, fine oats are 6d. a 1s. dearer. Floating and arrived cargoes of wheat, on Monday, were 1s. a 2s. dearer; and to-day this advance could be made. Istina corn, on the other hand, has become quite dull.
